To: Whom it may concern

I have been collaborating with Bill Montgomery and his group for two years providing NASA information to use in his classroom and public events. These activities are also located on our website at www.nasa.gov for anyone to have access to them. The Office of STEM Engagement provided Bill support by using current technology via webinars. Our interactions were all successful and the feedback from my team was excellent. Bill has taken advantage of the connections provided by our office to proactively make connections with other NASA Centers, content and curriculum.

Bill is very good at communication & follow up, which is an extremely valuable trait in today's fast paced environments. We must be flexible, and Bill understands this very clearly through his collaboration style. It has been a pleasure helping him reach people through the information we have provided. We will continue to support events with NASA materials and other means as possible. His passion for education is in line with ours as we continue to look for collaborators like him. His focus on Transportation & Technology using cars has provided a platform for NASA to reach more people.

I highly recommend Bill Montgomery for a position within your organization. He has clearly demonstrated his ability to collaborate in order to reach a clear goal. Please feel free to reach out to me if you have further questions.

Regards,
